TSS Software Corporation celebrates 20 years of title industry service

ANNAPOLIS, MD –This year TSS Software Corporation marks 20 years of offering technology solutions to the real estate title and settlement services industry. Founded in 1993, with a mission to enhance and improve the way title agents manage their workflow, TSS has evolved from a small regional startup into a highly experienced title technology provider serving a large array of title insurance agents and underwriters nationwide.

“Though TSS has expanded significantly over the last two decades, the founding principles remain the same,” states Barbara Miller, president and chief operating officer. “Our technology solutions are developed for industry professionals by a team of industry professionals. We pride ourselves on the fact that we know title.”

To commemorate the company’s 20th anniversary, TSS plans a series of special offerings reflecting appreciation for its many long-time, loyal customers.
