

TSS SOFTWARE ANNOUNCES INTEGRATION WITH TRUSTLINK

ANNAPOLIS, Md., August 12, 2014 – TSS Software, a leading technology solutions provider to the title and settlement services industry, announced today the integration of TitleExpress® with First American SMS' TrustLink platform. This integration gives TitleExpress customers easier visibility through increased capacity to share and view data between the two platforms.

TitleExpress customers will benefit from TrustLink services through the daily three-way reconciliation which clears items from TrustLink directly in TitleExpress, eliminating the need for duplicate data entry. This service also provides full transparency into escrow accounts, segregation of data and duties through this third-party service, and access to detailed account information from anywhere there is an internet connection.

“This integration will further help our customers by assisting them in meeting ALTA’s Best Practice #2 and providing them even more visibility into their internal data and processes,” Mickey Jones, General Manager at TSS, commented.

Mutual customers will also benefit from 24/7 access to MyTrustLink.com and additional Unclaimed Property and 1099/W-9 services.

For additional information about TrustLink Services, visit [SMS Trust Accounting Services](#).
